## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

## DETAILED ACTION

### *Election/Restrictions*

Claims 25, 28 and 35-36 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 37-42, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104. In addition, claims 43-47 are drawn to products that require all the limitations of the allowable product defined in claim 25 and are also rejoined.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on July 11, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Allowable Subject Matter*

The following is an examiner's statement of reasons for allowance:

Claims 25, 28, and 35-36 were rejected under 35 USC 103(a) over Finberg et al. in view of Muramoto et al., Halloran et al. and KSP Series Product Brochure. Finberg et al. taught particles composition composed of interpenetrating polymer networks of polydimethylsiloxane and another polymer. The compositions were envisioned to contact human tissue when in use; however, Finberg et al. did not teach polymethylsilsequioxane as the second polymer or cosmetic applications for the particles. Muramoto et al. taught that particles composed of semi and fully interpenetrating polymer networks were known for cosmetic use. The particles were sized between 1 and 10 microns. The KSP Series Product Brochure taught that the combination of polydimethylsiloxane and polymethylsilsequioxane in a single particle sized from 2 to 10 microns in diameter and intended for cosmetic use was known. Finally Halloran et al. taught that organization of two polymers in an interpenetrating polymer network was a known alternative to a blend or copolymer for the combination of two polymers. Taken together these references would have made the instant invention obvious to one of ordinary skill in the art. However, applicants submitted a declaration on October 14, 2009 comparing the viscosity of the a mixture of a silicone fluid with the same amount of 1) particles of the invention, 2) particles taught in the KSP Series Product Brochure (particles each with polydimethylsiloxane and polymethylsilsequioxane), 3) polydimethylsiloxane particles, 4) polymethylsilsequioxane particles or 5) a mixture of polydimethylsiloxane particles and polymethylsilsequioxane particles. Surprisingly, the particles of the invention yield a viscosity that is three orders of magnitude greater than the polydimethylsiloxane

particles and the mixture of polydimethylsiloxane particles and polymethylsilsesquioxane particles as well as four orders of magnitude greater than the particles taught in the KSP Series Product Brochure and the polymethylsilsesquioxane particles. This declaration is persuasive at demonstrating that the interpenetrating network arrangement of polydimethylsiloxane and polymethylsilsesquioxane in 2 to 10 micron diameter spherical particles have unexpected and therefore non-obvious properties. For this reason, the declaration is persuasive and the rejection under 35 USC 103(a) is obviated. In light of the withdrawal of the restriction requirement, claims 37-47 drawn to methods of making the particles as defined in claim 25 and products that include the particles of claim 25 as components are also non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
